TECHNICAL SESSIONS

EXHIBIT HALL

The Engineer's Energy Toolbox: Practices, Technologies, and Management

December 6 and 7, 2006

Galveston Island Convention Center at Galveston, Texas

How can energy management help your plant achieve its lowest long-term manufacturing cost? This will be one key to success in **chemical manufacturing** and **refining** in the coming decade. Hear about the best practices in programs and new technologies that are proving themselves today, to the management strategies that sustain results. Also, a special series of sessions will highlight **NOx reduction** technology implementation case studies by end-users.

For more information, to register, or to exhibit, go to www.showcasetexas.org
